

LOK.STARTUpCAMP international- Our offer

LOK.STARTUpCAMP international supports refugees with a fair chance of residence permit, who want to get self employed, providing the appropriate tools. We do counselling as well as qualifying. Our entrepreneurship training is based on expert knowledge by multilingual coaches. Moreover, we are providing a space where people can work on their business plans with the help of our advisers.

What is LOK.STARTUpCAMP international doing for you?

1. In a first meeting we speak about your plans, about your experiences and your knowledge

In our first meeting we also find out whether your planned start up generally is possible and whether there are further formal issues required.

In the following assessment we deepen our first impression and clarify the perspectives of your business idea.

2. Our Coaches will then compile the business planing with you to have the business prepared professionally

Counselling will take part on an individual base or in group. Together you and your coach will work out your business plan; we assist you in accessing the financial means for your enterprise and in finding the right space. You receive help in handling authorities; in our specialised workshops you extend your knowledge in bookkeeping, taxes, marketing etc.

In order to build up your own enterprise successfully, you need German language skills. Whenever it is possible we will use the german language in our meetings with you.

3. Our business lab provides a place where you can prepare your business in peace

The business lab gives you the opportunity of doing research, calculating and writing. You communicate with the other founders inside the lab, probably plan common business with them and develop networks. An experienced coach gives support on any question concerning your business.

4. Mentors connected to economy accompany you technical and mental

We match you as entrepreneur and as business men or women, who like to pass on their knowledge and their experience. The regular exchange between both of you provides you with valuable knowledge and so accelerates a faster arrival in your new environment. Also your mentors will benefit by getting new experience on your homeland and your culture.

5. After Start up

After you actually started your business the real challenge also starts. So our support does not end at this point.
